SUBJECT INDEX

Volume 58 (1988)

Abscisic acid, *Picea glauca*, somatic embryogenesis, maturation, abscisic acid analogues, 77
Abscisic acid analogues, *Picea glauca*, somatic embryogenesis, abscisic acid, maturation, 77
Acacia cells, phosphorylase (kinetics), laminarinase, 165
Acer pseudoplatanus, ammonium, non-autotrophic CO_2 fixation, 151
Agrobacterium transformation, *Solanum tuberosum*, monohaploids, diploids, hairy roots, genetic stability, 193
Alfalfa, Calcofluor White, cell division, electrical stimulation, Hoechst 33258, immunofluorescence, 183
Alginate, protoplast culture, cell immobilisation, nurse culture, *Medicago sativa*, *Nicotiana tabacum*, 203
α-Aminooxyacetate, phosphite, *Phytophthora cryptogea*, *Vigna unguiculata*, phenylalanine ammonia-lyase, 245
Ammonium, non-autotrophic CO_2 fixation, *Acer pseudoplatanus*, 151
Atrazine, *Solanum*, isozyme, protoplast fusion, somatic hybrid plants, 51
Autophosphorylation, *Medicago varia*, calcium, protein kinase, histone, 135

Bacteriolysis, lysozyme, muramidase, wheat germ, cell wall hydrolysis, chitinase, 43
Blue-light photoreceptors, gametangia, phytochrome, calcium, magnesium, nitrate, 159
Blue and far-red light, bulbil, dormancy, gibberellic acid, photoperiodism, *Sedum bulbiferum*, 129
Brassica campestris, ovule culture, *Brassica oleracea*, *Raphanus sativus*, plant regeneration, 121
Brassica napus, diplotaxis harra, protoplast fusion, selection, somatic hybrids, 211
Brassica oleracea, Ca^{2+}, calmodulin, gabaculine, L-leucine uptake, phytochrome, 25
Brassica oleracea, ovule culture, *B. campestris*, *Raphanus sativus*, plant regeneration, 121
Bulbil, blue and far-red light, dormancy, gibberellic acid, photoperiodism, *Sedum bulbiferum*, 129

Ca^{2+}, *Brassica oleracea*, calmodulin, gabaculine, L-leucine uptake, phytochrome, 25
Calcium, gametangia, phytochrome, blue-light photoreceptors, magnesium, nitrate, 159
–, *Medicago varia*, protein kinase, autophosphorylation, histone, 135
Calcofluor White, alfalfa, cell division, electrical stimulation, Hoechst 33258, immunofluorescence, 183
Calmodulin, *Brassica oleracea*, Ca^{2+}, gabaculine, L-leucine uptake, phytochrome, 25
Carbohydrate-binding proteins, potato lectin, *Solanum tuberosum* agglutinin, potato virus X, 9
Cell division, alfalfa, Calcofluor White, electrical stimulation, Hoechst 33258, immunofluorescence, 183
Cell immobilisation, protoplast culture, alginate, nurse culture, *Medicago sativa*, *Nicotiana tabacum*, 203
Cell wall hydrolysis, lysozyme, muramidase, wheat germ, bacteriolysis, chitinase, 43
Chitinase, lysozyme, muramidase, wheat germ, bacteriolysis, cell wall hydrolysis, 43
Chlamydobotrys stellata, photosystem I, photosystem II, energy distribution, photoassimilation, photophosphorylation, 145
Chlamydomonas reinhardii, light-harvesting chlorophyll *a*/*b* protein, sulfolipids, chlorophyll *b*-deficient mutant, 15
Chlorophyll *a*/*b*-binding protein, transit peptide, chloroplast targeting, 171
Chlorophyll *b*-deficient mutant, *Chlamydomonas reinhardii*, light-harvesting chlorophyll *a*/*b* protein, sulfolipids, 15
Chloroplast targeting, transit peptide, chlorophyll *a*/*b*-binding protein, 171
Cordycepin, lipoxygenase (*Lupinus albus*), germination, cycloheximide, 35
Crocus sativus L, plant organ culture, scanning electron microscopy, stigma- and style-like structures, 93
Cycloheximide, lipoxygenase (*Lupinus albus*), germination, cordycepin, 35

Daucus carota, somatic embryogenesis, tissue culture, hormone-free medium, 103
Diploids, *Solanum tuberosum*, monohaploids, *Agrobacterium* transformation, hairy roots, genetic stability, 193
Diplotaxis harra, *Brassica napus*, protoplast fusion, selection, somatic hybrids, 211
DNA synthesis, germination, maize, histone synthesis, genome reprogramming, 71
Dormancy, blue and far-red light, bulbil, gibberellic acid, photoperiodism, *Sedum bulbiferum*, 129
Douglas fir, luciferase gene, protoplasts, transient gene expression, loblolly pine, pro-embryo formation, 85

Electrical stimulation, alfalfa, Calcofluor White, cell division, Hoechst 33258, immunofluorescence, 183
Electrophoresis, *Pharbitis nil*, flowering, gene expression, photomorphogenesis, organ specific, 1
Energy distribution, *Chlamydobotrys stellata*, photosystem I, photosystem II, photoassimilation, photophosphorylation, 145

Flowering, *Pharbitis nil*, electrophoresis, gene expression, photomorphogenesis, organ specific, 1

Gabaculine, *Brassica oleracea*, Ca^{2+}, calmodulin, L-leucine uptake, phytochrome, 25
Gametangia, phytochrome, blue-light photoreceptors, calcium, magnesium, nitrate, 159
Genetic stability, *Solanum tuberosum*, monohaploids, diploids, *Agrobacterium* transformation, hairy roots, 193
Gene expression, *Pharbitis nil*, flowering, electrophoresis, photomorphogenesis, organ specific, 1
Genome reprogramming, germination, maize, histone synthesis, DNA synthesis, 71
Germination, lipoxygenase (*Lupinus albus*), cycloheximide, cordycepin, 35
—, maize, histone synthesis, DNA synthesis, genome reprogramming, 71
Gibberellic acid, blue and far-red light, bulbil, dormancy, photoperiodism, *Sedum bulbiferum*, 129

Hairy roots, *Solanum tuberosum*, monohaploids, diploids, *Agrobacterium* transformation, genetic stability, 193
Histone, *Medicago varia*, calcium, protein kinase, autophosphorylation, 135
Histone synthesis, germination, maize, DNA synthesis, genome reprogramming, 71
Hoechst 33258, alfalfa, Calcofluor White, cell division, electrical stimulation, immunofluorescence, 183
Hormone-free medium, *Daucus carota*, somatic embryogenesis, tissue culture, 103

Immunofluorescence, alfalfa, Calcofluor White, cell division, electrical stimulation, Hoechst 33258, 183
Immunogold, nuclear protein, shoot development, *Pisum sativum*, 253
Induced mutation, *Pisum sativum*, *Melilotus alba*, symbiosis, nodulation, 177
In vitro fertilization, single grain pollination, kernel development, *Zea mays* L, 231
Isolated pollen culture, *Oryza sativa* L., pollen embryogenesis, plant regeneration, 239
Isozyme, *Solanum*, atrazine, protoplast fusion, somatic hybrid plants, 51

Kernel development, in vitro fertilization, single grain pollination, *Zea mays* L, 231

L-Leucine uptake, *Brassica oleracea*, Ca^{2+}, calmodulin, gabaculine, phytochrome, 25
Laminarinase, phosphorylase (kinetics), *Acacia* cells, 165
Light-harvesting chlorophyll *a/b* protein, *Chlamydomonas reinhardii*, sulfolipids, chlorophyll *b*-deficient mutant, 15
Lipoxygenase (*Lupinus albus*), germination, cycloheximide, cordycepin, 35
Loblolly pine, luciferase gene, protoplasts, transient gene expression, Douglas fir, pro-embryo formation, 85
Luciferase gene, protoplasts, transient gene expression, Douglas fir, loblolly pine, pro-embryo formation, 85
Lysozyme, muramidase, wheat germ, bacteriolysis, cell wall hydrolysis, chitinase, 43

Magnesium, gametangia, phytochrome, blue-light photoreceptors, calcium, nitrate, 159
Maize, germination, histone synthesis, DNA synthesis, genome reprogramming, 71
Maturation, *Picea glauca*, somatic embryogenesis, abscisic acid, abscisic acid analogues, 77
Medicago sativa, protoplast culture, alginate, cell immobilisation, nurse culture, *Nicotiana tabacum*, 203
—, *Verticillium* wilt, somaclonal variation, toxin selection, resistance breeding, 111
Medicago varia, calcium, protein kinase, autophosphorylation, histone, 135
Melilotus alba, *Pisum sativum*, symbiosis, induced mutation, nodulation, 177
Mitochondrial DNA, plasmids, sequence, sunflower, 59
Monohaploids, *Solanum tuberosum*, diploids, *Agrobacterium* transformation, hairy roots, genetic stability, 193
Muramidase, lysozyme, wheat germ, bacteriolysis, cell wall hydrolysis, chitinase, 43

Nicotiana tabacum, protoplast culture, alginate, cell immobilisation, nurse culture, *Medicago sativa*, 203
Nitrate, gametangia, phytochrome, blue-light photoreceptors, calcium, magnesium, 159
Nodulation, *Pisum sativum*, *Melilotus alba*, symbiosis, induced mutation, 177
Non-autotrophic CO_2 fixation, ammonium, *Acer pseudoplatanus*, 151
Nuclear protein, shoot development, *Pisum sativum*, immunogold, 253
Nurse culture, protoplast culture, alginate, cell immobilisation, *Medicago sativa*, *Nicotiana tabacum*, 203

Organ specific, *Pharbitis nil*, flowering, electrophoresis, gene expression, photomorphogenesis, 1
Oryza sativa L., isolated pollen culture, pollen embryogenesis, plant regeneration, 239
Ovule culture, *Brassica oleracea*, *B. campestris*, *Raphanus sativus*, plant regeneration, 121

Pharbitis nil, flowering, electrophoresis, gene expression, photomorphogenesis, organ specific, 1
Phenylalanine ammonia-lyase, phosphite, *Phytophthora cryptogea*, *Vigna unguiculata*, α-aminooxyacetate, 245
Phosphite, *Phytophthora cryptogea*, *Vigna unguiculata*, α-aminooxyacetate, phenylalanine ammonia-lyase, 245
Phosphorylase (kinetics), laminarinase, *Acacia* cells, 165
Photoassimilation, *Chlamydobotrys stellata*, photosystem I, photosystem II, energy distribution, photophosphorylation, 145
Photomorphogenesis, *Pharbitis nil*, flowering, electrophoresis, gene expression, organ specific, 1

Photoperiodism, blue and far-red light, bulbil, dormancy, gibberellic acid, *Sedum bulbiferum*, 129
Photophosphorylation, *Chlamydobotrys stellata*, photosystem I, photosystem II, energy distribution, photoassimilation, 145
Photosystem I, *Chlamydobotrys stellata*, photosystem II, energy distribution, photoassimilation, photophosphorylation, 145
Photosystem II, *Chlamydobotrys stellata*, photosystem I, energy distribution, photoassimilation, photophosphorylation, 145
Phytochrome, *Brassica oleracea*, Ca^{2+}, calmodulin, gabaculine, L-leucine uptake, 25
—, gametangia, blue-light photoreceptors, calcium, magnesium, nitrate, 159
Phytophthora cryptogea, phosphite, *Vigna unguiculata*, α-aminooxyacetate, phenylalanine ammonia-lyase, 245
Picea glauca, somatic embryogenesis, abscisic acid, maturation, abscisic acid analogues, 77
Pisum sativum, *Melilotus alba*, symbiosis, induced mutation, nodulation, 177
Pisum sativum, nuclear protein, shoot development, immunogold, 253
Plant organ culture, *Crocus sativus* L., scanning electron microscopy, stigma- and style-like structures, 93
Plant regeneration, *Oryza sativa* L., isolated pollen culture, pollen embryogenesis, 239
—, ovule culture, *Brassica oleracea*, *B. campestris*, *Raphanus sativus*, 121
Plasmids, mitochondrial DNA, sequence, sunflower, 59
Pollen embryogenesis, *Oryza sativa* L., isolated pollen culture, plant regeneration, 239
Potato, *Solanum tuberosum* L., protoplasts, regeneration, suspension culture, 223
Potato lectin, carbohydrate-binding proteins, *Solanum tuberosum* agglutinin, potato virus X, 9
Potato virus X, carbohydrate-binding proteins, potato lectin, *Solanum tuberosum* agglutinin, 9
Pro-embryo formation, luciferase gene, protoplasts, transient gene expression, Douglas fir, loblolly pine, 85
Protein kinase, *Medicago varia*, calcium, autophosphorylation, histone, 135
Protoplasts, luciferase gene, transient gene expression, Douglas fir, loblolly pine, pro-embryo formation, 85
—, *Solanum tuberosum* L., regeneration, suspension culture, potato, 223
Protoplast culture, alginate, cell immobilisation, nurse culture, *Medicago sativa*, *Nicotiana tabacum*, 203
Protoplast fusion, *Brassica napus*, diplotaxis harra, selection, somatic hybrids, 211
—, *Solanum*, atrazine, isozyme, somatic hybrid plants, 51

Raphanus sativus, ovule culture, *Brassica oleracea*, *B. campestris*, plant regeneration, 121
Regeneration, *Solanum tuberosum* L., protoplasts, suspension culture, potato, 223
Resistance breeding, *Medicago sativa*, *Verticillium* wilt, somaclonal variation, toxin selection, 111

Scanning electron microscopy, *Crocus sativus* L., plant organ culture, stigma- and style-like structures, 93
Sedum bulbiferum, blue and far-red light, bulbil, dormancy, gibberellic acid, photoperiodism, 129
Selection, *Brassica napus*, diplotaxis harra, protoplast fusion, somatic hybrids, 211
Sequence, mitochondrial DNA, plasmids, sunflower, 59
Shoot development, nuclear protein, *Pisum sativum*, immunogold, 253
Single grain pollination, in vitro fertilization, kernel development, *Zea mays* L., 231
Solanum, atrazine, isozyme, protoplast fusion, somatic hybrid plants, 51
Solanum tuberosum, monohaploids, diploids, *Agrobacterium* transformation, hairy roots, genetic stability, 193
Solanum tuberosum agglutinin, carbohydrate-binding proteins, potato lectin, potato virus X, 9
Solanum tuberosum L., protoplasts, regeneration, suspension culture, potato, 223
Somaclonal variation, *Medicago sativa*, *Verticillium* wilt, toxin selection, resistance breeding, 111
Somatic embryogenesis, *Daucus carota*, tissue culture, hormone-free medium, 103
—, *Picea glauca*, abscisic acid, maturation, abscisic acid analogues, 77
Somatic hybrids, *Brassica napus*, diplotaxis harra, protoplast fusion, selection, 211
Somatic hybrid plants, *Solanum*, atrazine, isozyme, protoplast fusion, 51
Stigma- and style-like structures, *Crocus sativus* L., plant organ culture, scanning electron microscopy, 93
Sulfolipids, *Chlamydomonas reinhardii*, light-harvesting chlorophyll *a*/*b* protein, chlorophyll *b*-deficient mutant, 15
Sunflower, mitochondrial DNA, plasmids, sequence, 59
Suspension culture, *Solanum tuberosum* L., protoplasts, regeneration, potato, 223
Symbiosis, *Pisum sativum*, *Melilotus alba*, induced mutation, nodulation, 177

Tissue culture, *Daucus carota*, somatic embryogenesis, hormone-free medium, 103
Toxin selection, *Medicago sativa*, *Verticillium* wilt, somaclonal variation, resistance breeding, 111
Transient gene expression, luciferase gene, protoplasts, Douglas fir, loblolly pine, pro-embryo formation, 85
Transit peptide, chloroplast targeting, chlorophyll *a*/*b*-binding protein, 171

Verticillium wilt, *Medicago sativa*, somaclonal variation, toxin selection, resistance breeding, 111
Vigna unguiculata, phosphite, *Phytophthora cryptogea*, α-aminooxyacetate, phenylalanine ammonia-lyase, 245

Wheat germ, lysozyme, muramidase, bacteriolysis, cell wall hydrolysis, chitinase, 43

Zea mays L., in vitro fertilization, single grain pollination, kernel development, 231
